

EDITORIAL

The articles selected for this edition discuss several themes in Systems and Computing. We thank the authors and readers for the dissemination and growth of the Revista de Sistemas e Computação (RSC) as an important means of disseminating academic and scientific works. This allows researchers and students in the field of Computer Science, Information Systems, Computer Engineering, and related fields to find works with diversified topics to support their research and work.

In this issue we will have the following articles:

- A Tool for Determining Developer Expertise in Specific Frameworks or Libraries;
- Using a First-Order-Based Language to Automatically Synthesize Valid Arguments of Propositional Calculus;
- An Approach Based On CNN To Residential Environment Classification Focused On Real Estate Business;
- Performance Modeling of Big Data Environments in the Private Cloud;
- Segurança Digital: Relato de Experiência sobre Projeto Aplicado em Escola do Ensino Médio na Cidade de Mombaça-CE;
- Development of application for registration of veterinary procedures with Python language, frameworks and database;
- Redes Produtivas de Defesa Baseadas no Regime Especial Tributário para a Indústria de Defesa;
- The Efficiency of the Brazilian Payment System as per the Deployment of the Digital Currency based on DLT: Challenges and Opportunities.

The Revista de Sistemas e Computação consolidates itself as a solid reference for academic works. RSC has the practice of supporting regional and national events. Currently, the RSC has in its scientific committee professors from several national institutions, from all geographic regions of Brazil, as well as from renowned international institutions. We receive articles for evaluation from higher education institutions from all geographic regions of Brazil. We hope that these articles can contribute to your research and that they serve as an incentive for submitting your work to the RSC.

Prof. Dr. Paulo Caetano da Silva

Chief editor
