EDITORIAL

The articles selected for this edition discuss several themes in Systems and Computing. We thank the authors and readers for the dissemination and growth of the Revista de Sistemas e Computação (RSC) as an important means of disseminating academic and scientific works. This allows researchers and students in the field of Computer Science, Information Systems, Computer Engineering, and related fields to find works with diversified topics to support their research and work.

In this issue we will have the following articles:

• Shorextractor: um aplicativo desktop para extração automática de linhas de costa;

• Avaliando o Desempenho de Instâncias com Diferentes Discos e Regiões no Microsoft Azure;

• Estudo de caso sobre o uso das tics por professores do ensino médio na cidade de Mombaça/CE;

• Enhancing Access Control with SVM-Based Facial Recognition: Performance Analysis and Efficiency Evaluation;

• Fact or Fake? Comparing News Classifications Using Different Artificial Neural Network Architectures;

 • Implementação de um Sistema de Monitorização de TI Baseado em Ferramentas Open Source;

• A Lei de Benford e o Coeficiente de Gini Como Métodos Estatísticos na Análise de Dados Eleitoriais;

• Climatização Eficaz em Data Centers: Desenvolvimento e Implementação de um Sistema de Controle e Monitoramento;

• Climatização Eficaz em Data Centers: Desenvolvimento e Implementação de um Sistema de Controle e Monitoramento.

The Revista de Sistemas e Computação consolidates itself as a solid reference for academic works. In this edition, we have a partnership with the ENUCOMPI 2023 - Encontro Unificado de Computação do Piauí – event supported by SBC - Sociedade Brasileira de Computação, in which the best works were selected and given the opportunity to extend them to the current publication. RSC has the practice of supporting regional and national events. The partnership with ENUCOMPI is another of these initiatives. For this edition we will have articles from researchers from education and research institutions in Portugal and Tunisia, which highlights the quality of our publications.

Currently, the RSC has in its scientific committee professors from several national institutions, from all geographic regions of Brazil, as well as from renowned international institutions. We receive

articles for evaluation from higher education institutions from all geographic regions of Brazil. We hope that these articles can contribute to your research and that they serve as an incentive for submitting your work to the RSC.

Prof. Dr. Paulo Caetano da Silva
Chief editor
